Professional Summary

Quantitative strategist with 5+ years of institutional risk modeling, now building production-grade multi-asset research platforms across portfolio construction, regime-based allocation, risk management and equity valuation — integrating agentic AI-assisted workflows with traditional fundamental and quantitative analysis

Education

GEORGETOWN UNIVERSITY, McDonough School of Business — Washington DC, US
Master of Science in Finance, 3.95/4 — Aug'25 – Present

Indian Institute of Technology (IIT) Kanpur — Kanpur, IN
Bachelors of Technology, MSE — Aug'16 – Jul'20

Professional Experience

EXL | Senior Consultant, Risk Strategy & Modelling (Client: DFS, Citi) – NY, US — Nov'20 – Present

- Led and managed the validation of loss forecasting models for CCAR, CECL, and IFRS-9 regulatory submissions
- Led time series PD model development using hazard function, behavioral, and macroeconomic variables
- Conducted portfolio stress testing to simulate segment-level loss spikes under adverse macroeconomic scenarios
- Developed a Strategy Monitoring Framework integrating real-time data into loss, revenue, and ROE projection
- Performed data reconciliation, trend analysis, backtesting, and sensitivity analysis to strengthen risk assessments
- Improved model accuracy and reduced portfolio risk exposure by 25% through targeted model re-calibration
- Enhanced early risk identification by enabling strategy adjustments, leading to a 10% reduction in loss
- Optimized standard code and implemented model improvements in integration, reducing run-time by 50%

Academic & Project Experience

Multi-Asset Research, Allocation & Portfolio Construction (MRS | AM| RM) — May'26 – Jun'26

- Designed Macro Regime Score: five-factor composite (Growth 30%, Inflation 15%, Rate/Liquidity 15%, Credit 20%, Market Stress 20%) classifying monthly investment regimes (expansion / moderate / slowdown / stress)
- Built a governed multi-asset research universe across asset classes, with event-tagged sub-period analytics
- Developed SAA and DAA frameworks integrating regime signals, and Black-Litterman portfolio optimization
- Developed frameworks analyzing risk decomposition, factor exposures, diversification, Monte Carlo simulations

Equity Research & Valuation — May'26 – Jun'26

- Designed an agentic AI-assisted equity research and valuation workflow across Aerospace, Tech, and Energy
- Built competitive position framework and 10-year sequential DCF with sector-specific KPIs, peer benchmarking, sensitivity scenarios, and structured validation layers ensuring auditability and reproducibility

Leading Edge Financial (Wealth Management RIA) – Knoxville, TN — Jan'26 – Feb'26
Student Consultant, Georgetown University MSF Winter Clinic Program

- Engaged in a six-week consulting project focus on Equity Portfolio Review ($150M AUM) sponsored by Leading Edge team; culminating in an executive presentation showcasing team's unique problem solution
- Increased expected return by 286bps, reduced volatility by 241bps, and improved Sharpe ratio from 0.51 to 0.81
- Reduced portfolio beta from 1.07 to 0.84, strengthening downside protection and overall risk efficiency

Certifications & Skills

- Bloomberg Market Concepts (Bloomberg) · Financial Engineering Specialization (Columbia University)
- Machine Learning Specialization (Stanford) · Building RAG Agents with LLMs (Nvidia)
- Investment Banking Simulations: Fidelity (IM), JPMorgan (M&A), Citi (MQA) – Forage
- **Achievements:** Ace Award – H1 2021, H1 2024 · Stellar Performance – Q1 2023 · The Pioneer Award – H2 2023
- **Finance & Strategy:** Portfolio Construction, Asset Allocation, DCF Valuation, Financial Modeling, Risk Analysis
- **Tools:** Bloomberg Terminal, Morningstar, Advanced Excel, Tableau, Matlab, JMP Pro
- **Language:** Python, R, SQL, C/C++, SAS, VBA
